

Cryptokeez

The first blockchain based real estate investment through NFT

[Cryptokeez.io](https://cryptokeez.io)

ABSTRACT

What is Cryptokeez?

Cryptokeez makes invest in real estate with cryptocurrency real. Own our NFT and be a shareholder of one of our properties.

There are two ways to invest into this project: By acquiring our token or by buying our NFTs.

How it works

A team with 25 years of experience in rental market

Property

We buy the property and we rent it out.

NFT

We divide the property into 100 NFTs.

Annuity

We pay the annuity directly on the wallet holder of each NFT in stable coin on the 1st of each month at 12h UTC.

Real estate capital gain

You want to sell your share ? You can sell it on the liquid market easily and enjoy your capital gain.

Our missions

A team with 25 years of experience in rental market

Make the real estate market more liquid

You want to sell your property? Nothing could be simpler. You can sell your NFT as soon as you want. No need to wait weeks or months to get your money. The blockchain makes it instantaneous.

Allow you to invest all over the world

You have easy access to the real estate market of your country, but it is not necessarily the one that offers the best profitability. Thanks to CryptoKeez, you can invest anywhere in the world.

Instant owner

By buying an NFT, you instantly own a part of the property, and you will then collect the annuity just as quickly.

Make the real estate market accessible to all

We divide the price of each property by 100 NFTs, worth one hundredth of the price. The properties we offer range from several millions to less than 100K\$, so you can invest from a thousand dollars.

No administrative tasks

Our company takes care of everything and complies with local laws to offer you the goods.

Real economy

Your income is linked to the real economy. If there is a drop in cryptos, it does not impact your income. You secure part of your investment.

By investing in \$CKZ, you do not invest in a particular property but in all future properties, by becoming a shareholder of CryptoKeez.

Our token has many uses from a financial point of view as well as a decisional one.

\$CKZ benefits

- ✓ **Revenue sharing:** 50% of profits are shared with CKZ\$ holders
- ✓ **Priority on NFT purchase:** Some sales will be open several hours before only to \$CRZ holders
- ✓ **Special sales:** Some sales will only be accessible to token holders
- ✓ **Governance:** The choice of some new properties will be submitted to a community vote. In addition, certain strategic decisions will also be submitted to a vote.

NFT

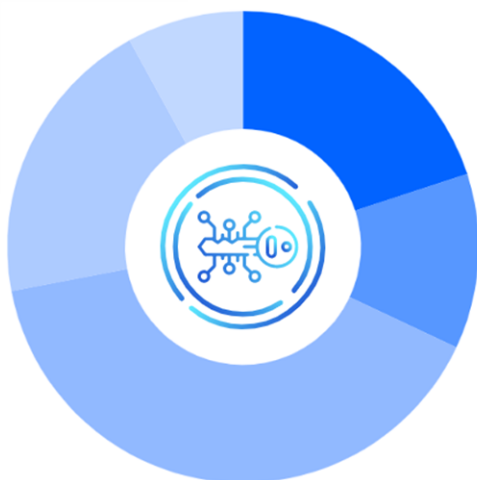

Our team invests in properties with the highest returns on rental market for our clients. The property is then divided into 100 NFTs where the owners can easily exchange their title. Every month, the income is distributed among the NFT owners, directly to wallets that hold the NFTs. As soon as an NFT is sold, the annuity is paid directly to the new wallet.

- ✓ 1 NFT = 1% of the property
- ✓ You can buy one or more NFTs for each property and sell them whenever you want
- ✓ Your income is paid every month on the wallet, which holds the NFT
